

RHINO
WHITEPAPER

<https://www.digirhino.co>

RHINO VISION

Building trust within the community is our highest priority. The people behind Rhino are all investors, just like you, who had all been victims of failed crypto projects. We're joining together to build a strategy to eliminate rug pulls and grow a long-term sustainable project to benefit you, as the investor, and eventually the world.

RHINO PLAN

We created a small supply of available Rhino tokens where most of them will be locked within our telegram game which will be released over time via daily rewarding system. As the community and the project grows, we will also grow with it creating more games, knowledge base, cross-network staking and charity donations.

RHINO TEAM TOKENS

An even smaller amount of the total supplies will be for the team who are working hard on this project. This will also be locked and distributed every 5 months at a time to ensure there's no possible rug pulls.

RHINO KNOWLEDGE BASE AND DONATIONS

The Rhino team decided to implement a small percentage of every Rhino transaction to be sent to a wallet which will then be used for charity. As time progresses, we will create a simple knowledge base for people to learn about crypto as well as giving back to the world.

RHINO TOKENOMICS

Token: Rhino (Rhi)

Network: Sol

CA: 2Av8otAiFzaLGXrMJkCCrvMWuqPXa4F57X1G4fy154Um

40,000,000,000 tokens - Locked in game wallet and play-to-earn rewards

3,000,000,000 tokens - Team allocation (vesting schedule) 1,000,000,000 coins unlocks every 5 months

10,000,000,000 tokens - Presale

7,000,000,000 tokens - Ecosystem development, community incentives, and marketing

PHASE 1 – PRESALE (Q4-Q1 – 2024/25)

- 10,000,000,000 Rhino tokens will be for sale at a set price of \$0.00025 each
- Once all the tokens have been sold they will then be airdropped to the investors provided SOL address of a vesting period to ensure the coins stability
- Over the period of the presale we will be undergoing AMAs and asking for community input as well as testing to improve the quality of the game

PHASE 2 – LAUNCH AND STAKING (Q2-Q3 – 2025)

- Once all the allocated presale tokens have been sold our developers will reset the game and everyone will be off to the races playing the game
- The players who had bought into the presale will of course have a leg up on everyone else reaching the overall goal of the game
- We will also be working on a downloadable game outside of the telegram platform using the funds raised during the presale
- (TBD) The team is devising a plan to enable staking of other coins for a set period of time in exchange for in-game Rhino tokens

PHASE 3 – (Q4 – 2025) CHARITY DONATIONS AND BEYOND

- Over time as the community grows, and players enjoy the game, we will be setting aside a small percentage of every Rhino transaction to a donation wallet
- Once we've accumulated a set amount of funds within the wallet we will then initiate a charity donation
- Our overall goal is to donate to making crypto a more streamline and easier way for everyone to access and use
- However, life does happen, and we will decide, as a community, if donating to any major events effecting the world at the time would be more beneficial to society

RHINO DAO

The Rhino team is always thinking about the future. We strive to improve and progress to the next chapter, and we have a vision to bring Rhino to a full ecosystem sustainable on its own.
